

Website Disclaimer

Vorynix Systems

Effective date: 12 July 2026

Last updated: 12 July 2026

Version: 1.0

1. Purpose of this disclaimer

This Website Disclaimer explains the limitations applicable to information, demonstrations, portfolio material and external resources made available through <https://vorynixsystems.co.za>.

It should be read together with the Website Terms of Use, Privacy Policy, Cookie Policy, Service Terms, Electronic Supplier Information and any project-specific quotation, proposal or agreement.

This disclaimer does not exclude or limit rights, warranties, remedies or liabilities that cannot lawfully be excluded under South African law. The Consumer Protection Act prohibits suppliers from imposing unfair, unreasonable or unjust terms or requiring consumers to waive rights or supplier liability on an unfair basis.

2. Supplier information

The website is operated under the Vorynix Systems trading identity.

Registered entity: AgriX Systems (Pty) Ltd

Trading division: Vorynix Systems

Registration number: 2026 / 244372 / 07

Country of registration: Republic of South Africa

Website: <https://vorynixsystems.co.za>

General enquiries: projects@vorynixsystems.co.za

Founder contact information : nduvho@vorynixsystems.co.za

Privacy enquiries: privacy@vorynixsystems.co.za

Information Officer and PAIA contact: informationofficer@vorynixsystems.co.za

Business address: Johannesburg, Gauteng, South Africa

Telephone: +27 69 751 8804

Additional legal and supplier details are available in the Electronic Supplier Information section. ECTA requires specified identifying, contact and transaction information to be accessible where its electronic-supplier provisions apply.

3. General information only

Website content is provided for general informational, portfolio and business-enquiry purposes.

It is intended to help visitors understand Vorynix Systems, the services we may offer, our technical capabilities, selected projects, our development approach, potential

technology solutions and our legal and compliance framework.

Website content does not, by itself, constitute:

- a binding quotation;
- a project specification;
- a technical guarantee;
- a service-level commitment;
- a contractual offer;
- a promise of availability;
- professional legal, financial or accounting advice; or
- confirmation that a particular solution is suitable for a specific organisation.

Project decisions should be based on an assessment of the relevant requirements, risks, budget, operational environment and applicable law.

4. No automatic client relationship

Accessing the website, submitting an enquiry, downloading material or communicating with Vorynix does not automatically:

- appoint Vorynix as a service provider;
- create a client relationship;
- create a partnership, agency or joint venture;
- reserve development capacity;
- guarantee project acceptance;
- create confidentiality obligations equivalent to a signed non-disclosure agreement; or
- oblige Vorynix to provide a quotation or service.

A binding service engagement arises only through the applicable accepted quotation, project agreement or other written confirmation.

5. No professional advice

Information published on the website is not intended to replace advice from an appropriately qualified legal practitioner, accountant, tax practitioner, cybersecurity specialist, regulatory adviser, engineer, healthcare professional or other regulated professional.

References to legal, security, privacy, infrastructure or compliance matters are provided as general information about Vorynix's approach and must not be treated as professional advice for a visitor's particular circumstances.

6. Accuracy and completeness

Vorynix aims to publish information that is reasonably accurate and useful.

However, we do not guarantee that every item of website content will always be

complete, current, error-free, technically exhaustive, suitable for every purpose, applicable to every jurisdiction or reflective of the latest project status.

Errors, omissions, outdated information or formatting problems may occur.

Visitors should obtain project-specific confirmation before relying on website content for a material commercial, operational, legal, security or financial decision.

7. Changes to information

Vorynix may update, correct, replace or remove website information without prior notice.

Changes may relate to services, technologies, personnel, project status, pricing approaches, development processes, portfolio material, legal documents, third-party providers, security practices and contact information.

The date shown on a page or legal document should be used to assess whether the information is current.

8. Service descriptions

Service descriptions on the website are general descriptions of capabilities Vorynix may offer.

They do not mean that every service is immediately available, appropriate for every project, includes every listed capability, is provided at a fixed price, follows the same delivery model, or includes maintenance or ongoing support.

The precise scope, deliverables, exclusions, pricing and delivery schedule are defined in project-specific documentation.

9. Pricing and estimates

Unless clearly stated otherwise:

- prices displayed or discussed on the website are not binding quotations;
- project costs depend on the assessed scope and requirements;
- delivery periods are estimates until confirmed in writing;
- third-party charges may apply separately;
- infrastructure, licence and usage costs may change; and
- changes in scope may affect cost and timing.

A binding price is established only through an accepted quotation, proposal, statement of work or project agreement.

10. Technology information

Technical information may be simplified to make it understandable to a general audience.

Diagrams, architectures, workflows and descriptions may omit security-sensitive details, infrastructure configuration, internal services, proprietary methods,

confidential integrations, implementation complexity and client-specific requirements.

A simplified architecture illustration should not be treated as complete implementation documentation.

11. Technology suitability

The appearance of a technology, platform, framework or provider on the website does not mean that it will be used for every project.

Technology selection depends on factors such as project requirements, scale, security, cost, performance, regulatory obligations, integration compatibility, client infrastructure and long-term maintainability.

Vorynix may recommend a different technology after discovery or technical assessment.

12. Artificial-intelligence information

Website content concerning artificial intelligence, automation or machine learning is provided for general informational purposes.

AI-supported systems may produce inaccurate or incomplete outputs, behave differently across contexts, require human review, depend on third-party models or infrastructure, incur variable usage costs and change as providers update their services.

No AI system should be regarded as infallible.

AI outputs should not be relied upon as the sole basis for medical, legal, financial, employment, safety-critical, regulatory or other high-impact decisions unless suitable human review, testing, governance and legal controls have been implemented.

13. Connected devices and prototypes

Information about IoT, embedded systems, robotics, sensors or connected products may relate to prototypes, demonstrations or systems under development.

Prototype systems may not yet be production-ready, independently certified, suitable for safety-critical use, weatherproof, commercially scalable, compliant with every regulatory requirement or tested in every operating condition.

Visitors must not infer production suitability from an experimental demonstration or development-stage image.

14. Portfolio and case-study material

The website may present completed client work, live systems, internal products, development-stage projects, prototypes, demonstrations, minimum viable products, anonymised engagements and confidential projects described in general terms.

Portfolio descriptions may be simplified, cropped, anonymised or adapted to protect personal information, client confidentiality, source code, credentials, security controls, proprietary architecture and commercially sensitive information.

A portfolio page may not represent the complete scope of the underlying project.

15. Project status

Project labels such as Live, In development, Prototype, MVP, Internal, Confidential or Selected case study describe the project status at the time the information was last updated.

A project may later be modified, suspended, replaced, transferred or discontinued.

Vorynix does not guarantee that every displayed client website, application or external service will remain publicly available indefinitely.

16. Client names and trademarks

Client names, project names, logos and trademarks displayed on the website remain the property of their respective owners.

Their inclusion does not imply that the client owns Vorynix, Vorynix owns the client's brand, an exclusive partnership exists, the client endorses every Vorynix service or Vorynix is authorised to represent the client generally.

Portfolio use is subject to the applicable permission, agreement or lawful basis.

17. Third-party technologies and brands

References to technology providers, platforms, frameworks or services are used to describe technical compatibility or project experience.

All third-party names, logos and trademarks belong to their respective owners.

References do not imply sponsorship, certification, accreditation, endorsement or formal partnership unless expressly stated.

18. External links

The website may include links to client websites, technology providers, regulatory authorities, documentation, social-media platforms, external services and third-party resources.

External websites are operated independently.

Vorynix does not control and does not guarantee their content, security, privacy practices, accessibility, availability, accuracy or continued operation.

Visitors use external websites subject to the external provider's own terms and policies.

A link does not automatically constitute endorsement.

19. Downloads

Documents, software, files or resources made available for download should be used only for their intended lawful purpose.

Although reasonable care may be taken, Vorynix does not guarantee that every downloadable file will be compatible with every device, suitable for every purpose, free from all defects or unaffected by transmission problems.

Visitors should maintain suitable security software and independently verify important downloaded material.

20. Website availability

Vorynix does not guarantee continuous or uninterrupted website availability.

Access may be interrupted by maintenance, updates, infrastructure changes, hosting outages, DNS problems, network failure, cybersecurity events, third-party provider issues and events beyond our reasonable control.

Vorynix may suspend or restrict access where reasonably necessary to maintain, update or secure the website.

21. Website security

Vorynix applies reasonable safeguards appropriate to the website and its supporting infrastructure.

However, no website, electronic communication or internet transmission can be guaranteed to be completely secure.

Visitors are responsible for securing their own devices, using updated software, protecting passwords, checking email authenticity, avoiding suspicious links and verifying unexpected requests for payment or credentials.

Technical, privacy or personal-information security concerns may be reported to privacy@vorynixsystems.co.za.

POPIA requires responsible parties to implement appropriate safeguards for the integrity and confidentiality of personal information.

22. Fraud and impersonation

Vorynix is not responsible for communications issued by unauthorised persons falsely claiming to represent Vorynix.

Visitors should verify unusual communications, particularly those involving changed banking details, urgent payment requests, password requests, one-time passwords, identity-document requests, confidential source-code access or unexpected file downloads.

Vorynix will not request banking passwords, payment-card PINs, one-time banking passwords or access to a personal email password.

Suspected impersonation should be reported to projects@vorynixsystems.co.za.

23. User-submitted information

Visitors remain responsible for information submitted through forms, email or other communication channels.

Visitors should not submit information that is unlawful, infringes third-party rights, contains malicious code, is misleading or fraudulent, they are not authorised to

disclose, or is unnecessary for the enquiry.

General enquiry forms should not be used to submit payment-card details, banking passwords, one-time passwords, unnecessary identity documents, highly confidential source code or special personal information unless specifically requested through a secure process.

24. Testimonials, reviews and statements

Testimonials or reviews may reflect the experience and opinion of the person who provided them.

They do not guarantee that another client will obtain the same result, delivery time, cost, performance or commercial outcome.

Testimonials may be edited for spelling, length or formatting without changing their intended meaning.

25. Forward-looking information

The website may discuss planned products, future features, development roadmaps, intended integrations, prototype capabilities and expansion plans.

Such information reflects intentions at the time of publication and is not a guarantee that the feature, service or product will be completed, launched or commercially available.

Plans may change because of technical findings, funding, market conditions, regulatory requirements, third-party dependencies or strategic decisions.

26. No guarantee of commercial outcome

Vorynix does not guarantee that a website, application or other digital system will automatically produce increased revenue, search-engine ranking, customer acquisition, investor interest, regulatory approval, market adoption, operational savings or commercial success.

Digital outcomes depend on factors outside software development, including market conditions, business strategy, pricing, content, marketing, staffing, customer demand and operational execution.

27. Limitation of liability

To the fullest extent permitted by applicable law, Vorynix will not be liable for indirect, incidental, special or consequential loss resulting solely from reliance on general website information without project-specific confirmation, inability to access the public website, use of external websites, use of incomplete or development-stage material, unauthorised use of website content, or circumstances beyond Vorynix's reasonable control.

Nothing in this disclaimer excludes or limits liability that cannot lawfully be

excluded, including any applicable statutory consumer remedy.

Any limitation must be read consistently with the Consumer Protection Act's requirements concerning fair, reasonable and transparent terms.

28. Consumer rights

Nothing in this disclaimer is intended to waive a consumer's non-excludable rights, exclude legally required warranties, avoid responsibility for fraudulent conduct, excuse grossly negligent or unlawful conduct where liability cannot be excluded, or prevent a person from approaching a regulator, tribunal, ombud or court.

Where there is a conflict between this disclaimer and a mandatory legal right, the mandatory legal right prevails.

29. Project-specific agreements

Where a visitor becomes a client, the relevant project is governed by its signed project agreement, accepted change requests, accepted quotation or statement of work, Service Terms and other applicable project documents.

Those documents may contain project-specific warranties, liability provisions, support terms and acceptance procedures.

30. Changes to this disclaimer

Vorynix may update this disclaimer to reflect changes in website functionality, services, technology, legal requirements, portfolio practices, third-party providers and business operations.

The current version will display its effective date, last-updated date and version number.

31. Governing law

This disclaimer is governed by the laws of the Republic of South Africa.

Nothing prevents a person from approaching any competent regulator, tribunal, ombud or court available under applicable law.

32. Contact details
